The task management solution for humans

Our goals

- Help people get things done!

- Provide easy task entry and scheduling

- Get tasks into a calendar so they actually get done

- Finally finish those projects slated for "later"

- Be more productive!

Our Innovation

- Schedule what people find important
- Schedule when people want to work
- Allow life to get in the way

Demo!

- Prepare to have your minds blown...

Now the how...

- ~1 weekend of work between 5 people
- Just getting started!

Joel Test

- ✔ Repo layout
- ✔ Build system
- ✔ Test harness
- ✗ Bug DB

Prototype

- Pretty simple implementation
- Scheduling algorithm can vary
- UI can vary

Design Choices

- Scala for backend

- MySQL for DB

- AngularJS for frontend

- Bootstrap for CSS help

- Less

Productivity

- -~1000 lines of scala code
- -200-300 lines of HTML
- -~200 lines of JS

Roadmap

- Get some real value in scheduling

- Learn more about users

- Make it pretty

- Integration with other calendar services
